PROFESSIONAL WORK EXPERIENCE:

Registria

Web Developer (1 Year)

September 2016 – September 2017

Description:

Registria provides post sales product registration and customer management for major consumer electronics brands such as Sony, LG, Whirlpool etc. I was responsible for developing and maintaining the front end for their web and Mobile platform.

Responsibilities:

- Used JQuery, shopify liquid-template language, bootstrap to create signup and on boarding flows
- Implemented features such as locale switchers, dynamic input validation, and IP detection
- Updated company's Photo register work flow for Web Liquid template to fix recurring issues and increase implementation workflow efficiency

Developed a new template based Workflow which helped in increasing efficiency of creating product registration and on boarding workflow for major, that is by having a standard template's which could be used for multiple clients with minimal efforts such as logo, colour, text etc. New workflow helped in increasing product registration for all major brands such as Icon, Whirlpool, LG, Frigidaire etc

Example: https://whirlpool.registria.com/pr_reg
